

Review 0 Resolutions

Addressing critical marketplace challenges with innovative solutions

Pay-per-Lead Model

Providers pay ₹5-10 per confirmed job instead of subscriptions, removing financial barriers to entry.

Privacy Protection

VOIP calling hides customer numbers whilst UPI Intent eliminates bank account linking requirements.

Platform Loyalty

Search ranking incentives and customer loyalty points prevent bypassing the platform.

Dispute Resolution

Work-proof photos and 24-hour accountability window replace complex admin-refund processes.

Service Workflow

From discovery to completion in six seamless steps

Technical Implementation

Four core modules powering the platform

1

Auth & KYC Module

Manages Firebase authentication and Police Clearance Certificate verification for provider trustworthiness.

2

Matching Engine

Utilises Geo-hashing algorithms for real-time, location-based service broadcasting to nearest providers.

3

Communication & SOS

Handles VOIP calling infrastructure and multi-tier alert system: Contacts + Admin + IVR Nudge for emergencies.

4

Transaction Ledger

Manages provider's prepaid wallet and asynchronous debt settlement for cancellation penalties.

Technology Stack & Testing

Technology Stack

- **Frontend:** Flutter for iOS and Android apps
- **Backend:** Node.js with Express for real-time handling
- **Database:** PostgreSQL for core data + Redis for GPS caching
- **Hosting:** AWS or Google Cloud with Cloudinary for images

Testing Strategy

- **Unit Testing:** Individual components like ranking formula validation
- **Integration Testing:** SOS trigger during mock-live sessions
- **UAT:** Local worker testing to ensure simple, intuitive UI

Minimum Viable Product

Focused launch strategy for market validation

Target Area

Single 2-km cluster to validate demand and supply matching at hyper-local level

Core Services

Plumbing, Electrician, and Carpenter trades to test multi-category functionality

Essential Features

Provider "Online" toggle, GPS-based "Top Pick" cards, SOS button, UPI payment logging, and work-proof photo upload

Field Research Insights

Survey of 10 local service providers revealed critical market preferences

90%

Immediate Payment Preference

Workers prefer instant cash or UPI over app-based monthly settlements

Key Findings

- Customers prioritise **safety and identity verification** over low prices
- Existing WhatsApp groups for services are chaotic and unprofessional
- Strong demand for professional directory with real-time "Online" status
- Trust through verification outweighs cost considerations

Business Strategy

Revenue streams and marketing approach for sustainable growth

Micro-Fees

₹5-10 per lead deducted from provider wallet, creating sustainable revenue without subscription barriers

Contextual Ads

Local hardware shop advertisements displayed in the "Request" module for targeted exposure

Partner Shops

Physical locations act as "Redeem Points" centres for customer loyalty rewards

RWA Partnerships

Tie-ups with Residents Welfare Association groups for community-level distribution

QR Placement

Strategic positioning at hardware shops and local junctions for easy discovery

The Solwin Guarantee

Safety-first approach with robust dispute resolution

1

Police Clearance Certificate

Mandatory PCC verification required for "Verified" badge, ensuring background-checked providers

2

10-Minute Nudge System

Automated IVR call if provider ignores complaint, escalating to admin intervention

3

Loss Recovery Protocol

Platform compensates provider's petrol costs for late cancellations; recovered from customer's next booking via negative balance

Summary: From Idea to Ecosystem

Transforming local service delivery through trust and technology

Key Achievements

Moved from basic app concept to **Local Economy Ecosystem**. Resolved growth versus rules conflict using soft-friction debt settlement instead of hard blocks. Prioritised urgency through UI showing "Nearest & Best" immediately.

System Functionality

Solwin operates as a **High-Trust Matchmaker** finding best nearby help through weighted ranking of distance and rating. Secures interactions via GPS-verified arrival and SOS button. Ensures quality through mandatory post-job photo documentation and 24-hour reputation buffer. Generates revenue through micro-leads and local ads whilst protecting customer payments.

5-10

Per-Lead Fee

₹5-10 micro-fees from provider wallet

24

Hour Guarantee

Service quality window for disputes
